Findings of Student Satisfaction Survey:

The Student Satisfactory Survey for the session 2018-19 provided us insights in various fields. Students’ responses in the fields of admission process, course content, completion of course, library support, student-teacher relationship, extra-curricular activities, and overall performance of the institution are excellent, and good. However, quite a good number of responses are average especially in the fields of library support, career counseling and placement facilities. However, responses indicate that slight improvement has been observed in the field of career counseling and placement facilities as compared to previous academic year. Hence, action may be taken to improve in the concerned fields.
